

THE COUNTERING RADICALIZATION CONTINUOUS PROFESSIONAL DEVELOPMENT TRAINING

Youth work professionals from each partner country participated in a week-long workshop in Schwerin, Germany in April, to test the Continuous Professional Development Training Curriculum.

The completely new curriculum will empower youth professionals and other front-line staff to deal with the threat of radicalization and to **use readily available digital media tools and platforms**.

The training started with background information and discussions about different social media channels, their effect and typical user profiles, gradually advancing to the elements in video production and then a hands-on exercise where the participants created their own short films and it received a very positive feedback from all the participants.

The training curriculum and the numerous annexes are available for download on the project website!
